

ADD YOUR CITY

Create this project for your city.

We’re still working on this page, but here is some basic info for now.

This project took shape over a weekend in Washington, DC. Unfortunately, the gender speaker gap is in no way limited to DC. The research and website are both open source and easily reproducible for your city. The most important element is local advocate(s) to engage the city's tech community. If you think that's you, read on.

CONNECT

Connect with an advocate in another city so they can help you along the way.

COLLECT THE DATA

Create a dataset using this tool
Add it to data.world

we should embed stats from github on here to show that people are watching / committing / interested

TELL THE STORY

Visualize the data
Use kate’s template
Link to tableau public

FORK THE LIST

Fork this repository
Add a folder with your city’s name
Copy this file over
Submit a pull request

SHARE

Tell local meetup organizers what you found, and about your solution

Tell Your Friends

Share this with women and non-binary people in your life that you think are or would make great speakers.
